

My name is Paul Pavletich

I have had a nonstop passion for Motorcycles for nearly 50 years.

Not only have I served on motorcycle club boards for many years, where I have been a general committee member to club president, I presently serve on a successful NZCMRR committee.

Currently I am a professional motorcycle instructor living a life that merges my passion with my work.

I am a regular competitor in road racing and ride social motocross most weeks.

I have General Management experience with corporate and NFP organizations and would like to apply my experience to the parts of our sport that need a full strategic review.

I believe we need to **raise the profile** of motorcycling in NZ to encourage more, well-deserved, interest in the sport.

- ✓ I would love to **encourage more female** competitors and officials.
- ✓ I would like to create a **Pacific race series** using standardized classes, across road racing and MX formats.
- ✓ Improving **circuit safety** would be a high-priority.
- ✓ Giving **more training** to officials is also important.
- ✓ Having a full **road race class review** to streamlining the classes.
- ✓ The creation of an **academy for young riders**, within all disciplines would help the future of two-wheeled motorsport in New Zealand.
- ✓ To accomplish these goals I would wish to bring the best minds available to map out a better, more financially viable future.

I understand times are hard financially for most folks and racing is a luxury, so we need to work out a more affordable path to grow the sport and engage the next generation better.

In the past, as CEO of MNZ for 4 years, I led the team to successfully run 2 World Championship events, brought in record sponsorship, enabling us to televise MX and Road Racing championship events. Introduced the code of conduct, online licensing and the member benefit program. I also led the highly successful "Celebration of Motorcycling" show for MNZ.

I am a team player and would be happy to listen to your ideas or points of view regarding MNZ and I am fully committed to give guidance, and to support commissioners and staff, in line with the constitution.

If you want positive change, please give me a chance to make the necessary strategic changes we need.
